

FlexShares STOXX® Global Broad Infrastructure Index Fund (NFRA)

FLEXSHARES EXCHANGE TRADED FUNDS

[MUSIC PLAYING] The FlexShares STOXX Global Broad Infrastructure Index Fund, NFRA, attempts to provide investors with a global equity portfolio consisting of companies that offer the inflation hedging, income, and total return potential of infrastructure ownership. Rebuild NFRA through a two-step process. First, redefine the investable universe of stocks that generate at least 50% of their revenues from six key infrastructure super sectors. These are energy, communications, utilities, transportation, and two innovative sectors, government outsourcing and social. To qualify, the stocks need to have a three-month average trading volume of at least \$1 million US.

Next, we weight the index, applying a number of constraints. This includes a maximum of 40 different stocks from each super sector, caps on the maximum number of companies per sector, and limitations on exposure, including maximums of 5% in any individual security, 30% in any super sector, and 40% in any country. The fund is reconstituted annually and rebalanced every quarter. To learn more about the FlexShares US Quality Low Volatility Index Fund, visit flexshares.com/funds/nfra.

Before investing consider the Fund's investment objectives, risks, charges and expenses. Go to flexshares.com for a prospectus containing this information. Read it carefully. Foreside Fund Services, LLC, distributor.

All investments involve risk, including possible loss of principal. Funds' returns may not match returns of their respective indexes. Risks include fluctuation of yield, income, interest rate, non-diversification, asset class and market.
